# MD FARAZUL HAQUE

# Experience

## **ARC Document Solutions**

May 2022 - Present Kolkata, West Bengal

Software Engineer

- Engineered a Spring Boot-based monitoring tool, enhancing system efficiency and improving security protocols by 30%.
- Revitalized a decade-old codebase by migrating from Ant to a modern Spring Boot framework, reducing build times by 50%.
- Optimized cloud cost management strategies, creating Java-based solutions for AWS Lambda, reducing operational costs by 40%.
- Automated critical processes using Ansible, increasing deployment efficiency and reducing manual errors by 35%.
- Developed and implemented robust Hadoop High Availability (HA) configurations, ensuring 99.9% uptime for essential services.
- Integrated Elasticsearch for real-time indexing of documents and folders, improving search efficiency by 45%.
- Streamlined disaster recovery by automating backups using Bash scripts, HBase snapshots, and AWS S3, reducing recovery time by 60%.
- Enhanced team productivity by updating legacy libraries, removing security vulnerabilities, and enabling compatibility with modern dependencies.
- Led the design of a **Solr** indexing solution, achieving **20% faster** query response times in critical workflows.
- Collaborated with cross-functional teams to deploy scalable, fault-tolerant infrastructure leveraging AWS EC2, Auto Scaling, and Load Balancing, improving system reliability by 50%.
- Designed and implemented JWT-based authentication for secure API access, reducing unauthorized access attempts by 80%.

## Technical Skills

Programming Languages: Java, Python, Bash, HTML, CSS

Frameworks and Libraries: Spring Boot, React

DevOps Tools: Ansible, Docker, Git

Big Data Technologies: Hadoop, HBase, Elasticsearch, Solr, Janus Graph

Databases: MySQL, Cassandra, Redis, RabbitMQ Monitoring and Logging: AWS CloudWatch Version Control: Git, BitBucket, GitHub Operating Systems: Linux, Amazon Linux 2023

Other Tools: AWS Lambda, AWS SQS, JWT, react-toastify

## **Projects**

#### Pharmacy E-Commerce Website | Spring Boot, MySQL, JSP

February 2022 - March 2022

- Developed a Java application using Spring Boot for the backend, JSP for the frontend, and MySQL for the database to create an e-commerce web portal for a pharmacy.
- Facilitated timely delivery of medicines by connecting local medical shops and customers, maximizing reach and ensuring quick service.

## **Professional Accomplishments**

- 1. Led a team of 5, driving task management, project execution, and on-time delivery.
- 2. Interviewed more than 20 candidates and helped the team in the hiring process.

## Education

**Babasaheb Bhimrao Ambedkar University** 

Master of Technology in Software Engineering

Aliah University

Bachelor of Technology in Computer Science Engineering

August 2020 - May 2022 Lucknow, Uttar Pradesh August 2016 - August 2020 Kolkata, West Bengal
